MID-RANGE COLLECTION INDONESIA • Bali

Let the sun shine in! And so it does at all three side-by-side residences that make up this nine-bedroom property located – as the name implies – just down the road from sleepy Sanur.

Wherever physically possible, floor-to-ceiling folding glass doors replace the walls at Sanur Residence. As well as providing lots of natural light, these windows on the world grant unobstructed views of the black sands of Padang Galak Beach and its promenade-topped breakwater which lies just 100 metres away, and beyond to Nusa Penida Island across the Bandung Straits.

Sanur Residence was built as a beach pad for an extended family, and while its design is simple and functional, the ambience is more 'home' than 'villa'. All three residences are self-contained and have their own dining and living rooms, feature large second floor terraces, master bedroom Jacuzzis, modern terrazzo bathrooms and small service kitchens. What sets them apart from each other is their different layout.

The master bedroom of House One is on the ground level and is smaller than the expansive second-floor suites of Houses Two and Three. A Jacuzzi tub is shared between the bedrooms in Houses One and Three while the bedrooms in House Two share a bathroom. House Three has the only stand-alone media room for watching television, which is incorporated in the living room of the other houses.

Different interior accents – flooring, soft furnishings, lighting and artwork – give each residence a distinct ambience. What they do share is the 25-metre swimming pool, terraced gardens, a multi-purpose room (perfect for a small conference), a central staffed kitchen and a bolé with built-in cushioned seating at a corner just above the rice fields.

This contemporary vacation accommodation is ideal for three families sharing or for a group gathering. Sanur Residence exudes an air of serenity and cosiness as every sunny, bright, thoughtfully designed beachside home should.
